

2008 Air Race Classic

Leg #1 – KBZN-KMLS

226.3 nm

KBZN – 4,471 ft elevation. **Rwy 12/30** 8,992 ft x 150 ft

Depart KBZN to the east approx course 81 degrees toward Mission VOR – (**LVM - 116.10**) – 29.6 nm distance.

Watch for mountains east of KBZN – 2,500 feet above field elevation. You can follow the highway through the hills, but still important to climb quickly. It will be a density altitude takeoff with poor performance in non-turbocharged aircraft.

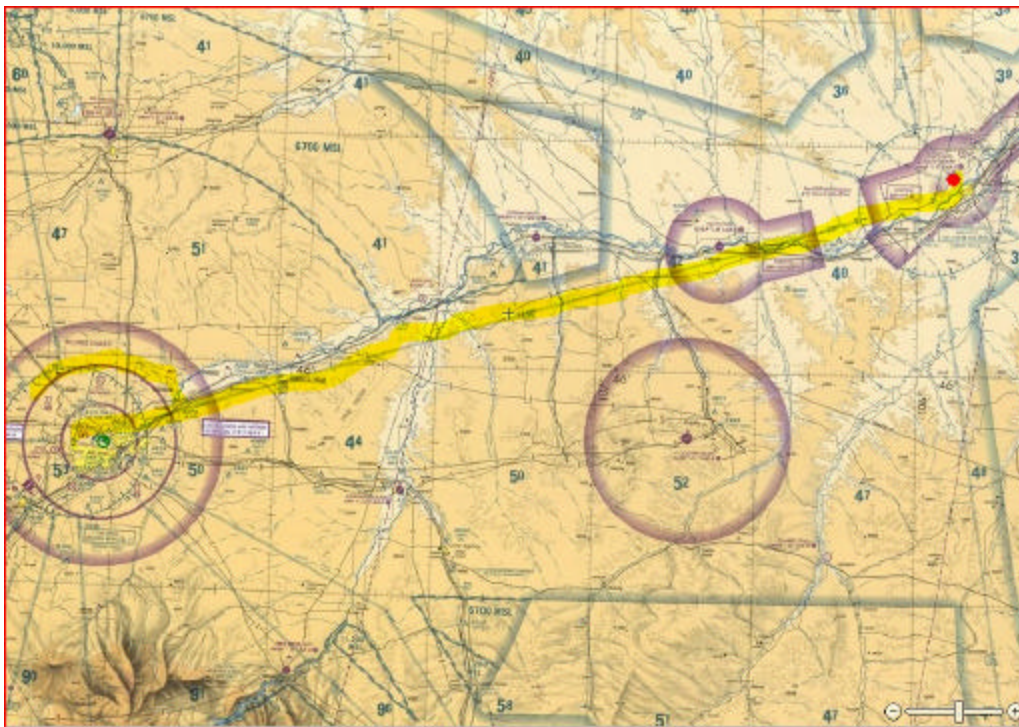

(Chart screen shots from www.skyvector.com)

From the Mission VOR pickup the V-86 airway toward Billings Montana – approx course 070 – 77 nm

The Billings VOR – (**BIL – 114.50**) is at the airport. Billings is Class C airspace with restrictions on traffic from 4,400 ft to 7,700 ft in the outer ring, and 7,700 ft to the surface on the inner ring. If you are not flying above 7,700 ft, circle north around the airspace.

Pickup the V-465 airway leaving the Billings VOR on course 057 toward Miles City – 120 nm.

The Miles VOR (**MLS – 112.10**) is about 4 nm southwest of the airport a bit east of the line for landing on Rwy 04. **KMLS** elevation is **2,630 ft** – **Rwy 04/22** – 5,672x75 & **Rwy 12/30** – 5,617x100. **NDB – HTN – 320.0** is 2 ½ nm from Rwy 04 threshold a bit west, not in line with the VOR and runway.
